## SELECTIONS OF ARTICLES

The evaluation of publications is carried out by a Commission consisting of the editor-in-chief and five other members of the PJA/CA editorial committee appointed by the editor-in-chief.

The Commission does not include the authors/co-authors of the papers under evaluation.

Each member of the Commission evaluates all papers and scores each article from 1 to 20 points in total, up to 5 points in each of four categories:

- significance of the research problem;
- an original contribution to the development of the scientific discipline;
- methodological correctness, statistical criteria and visualization of research results;
- efficiency and linguistic correctness in the presentation of the literature review and the discussion of the research results.

The PJA/CA editor-in-chief summarizes the evaluations submitted by the all members of the Commission and awards prizes based on this. The decision of the editor-in-chief is final and does not require justification. Therefore, no appeal procedure is provided.
